$J(\Psi)$ singular
genuine:
exponent jumps
only $J(\Phi+\Psi)$ singular
spurious:
converse jumps
$J(\Phi+\Psi)$ invertible
stable: scales
set by the floor
$10^{2}$
$10^{0}$
$10^{-2}$
$10^{-4}$
$10^{-6}$
nats per use
genuine
spurious
saturation
converse $D_{\mathrm{BS}}$ (exact)
exponent $\zeta$ (schematic)
$p\ln(1/p)$
$2\sqrt{p}$
miscalibration $\delta$ (log scale)
